

Curriculum Vitae: M. Coleman Miller

Date of Birth: 6 July 1968
Place of Birth: Detroit, MI
Citizenship: USA

The University of Maryland
Department of Astronomy
College Park, MD 20742-2421

E-mail: miller@astro.umd.edu
Telephone: (301) 405-1037
FAX: (301) 314-9067
Webpage: <http://www.astro.umd.edu/~miller/>

Research Interests

Theoretical Astrophysics	Computer Simulations and Modeling
Physics of Dense Matter	Physics in Strong Magnetic Fields
General Relativity	Gravitational Radiation
Plasma Physics	Gravitational Lensing

Education

1984 - 1990 California Institute of Technology, Pasadena, California
Department: Physics, with Computer Science minor
Thesis Topic: Radiation Transfer in Very Strong Magnetic Fields
Degrees: M.S. (1986), Ph.D. (1990) (Advisor: E. S. Phinney)
National Science Foundation Graduate Fellow, 1984-1987

1980 - 1984 Hillsdale College, Hillsdale, Michigan
Major fields: Mathematics and Physics
Degree: B.S., Summa Cum Laude (1984)

Research Experience

2009 - 2020 Professor of Astronomy, University of Maryland
Radboud Excellence Professor, Radboud University, Nijmegen, Netherlands

2017 - 2019 Chair, Maryland Astronomy Center for Theory and Computation

2015 - 2019 Astronomy Director, Joint Space-Science Institute

2013 - 2014 Director, Joint Space-Science Institute

2004 - 2009 Associate Professor of Astronomy, University of Maryland

2004 - 2006 Chair, Maryland Astronomy Center for Theory and Computation

1999 - 2004 Assistant Professor of Astronomy, University of Maryland

1997 - 1999 Member of the AXAF Science Center, Chicago beta test site

1994 - 1997 Compton Gamma-Ray Observatory Fellow, University of Chicago

1993 - 1999 Research Scientist, University of Chicago
Constructed the first detailed model of kilohertz QPOs of neutron star low-mass X-ray binaries, investigated gravitational lensing of gamma-ray bursts and galaxies, and performed various studies of accreting black holes and neutron stars.

1993 Visiting Scientist, Nordita, Copenhagen
Examined effects of radiation forces on accretion onto unmagnetized neutron stars in full general relativity

1990 - 1993 Postdoctoral Research Associate, University of Illinois at Urbana-Champaign
Studied electrodynamics and particle acceleration around accretion-powered neutron stars, investigated thermal emission from isolated neutron stars, and examined methods for the determination of the magnetic inclination angles of pulsars

1985 - 1990 Research Assistant, California Institute of Technology
Developed and extended computer programs to calculate atomic data in very strong magnetic fields, used this data to investigate radiation transfer in the atmospheres of neutron stars with strong magnetic fields, and studied particle orbits around rotating and nonrotating black holes

Curriculum Vitae of M. Coleman Miller, Page 2

1984 Capacity Planning Analyst, Burroughs Corp., Detroit, Michigan
Designed computer performance reporting and analysis programs

Teaching and Outreach Experience

2023 Distinguished Faculty Teaching Prize in the Department of Astronomy, University of Maryland

2022 Prize for Excellence in Mentoring in the Department of Astronomy, University of Maryland

2021 Instructor, Karpacz School of Theoretical Physics, Karpacz, Poland (virtual)

2019 Instructor, masterclass on neutron stars, Nordita, Stockholm, Sweden

2017 Distinguished Faculty Teaching Prize in the Department of Astronomy, University of Maryland

2017 Instructor, Kavli summer school on gravitational wave astronomy at the Niels Bohr Institute, Copenhagen, Denmark

2016 Instructor, winter school on gravitational wave astronomy at UFABC, São Paulo, Brazil

2015 Instructor, summer school on gravitational wave astronomy at the Indian Institute of Science, Bengaluru, India

2014 Instructor, “Look & Listen” winter school (gave lectures on gravitational waves), Playa del Carmen, Mexico

2012 Consultant for the Maryland Dance Ensemble performance “Gravity”

2005, 2006 Astrophysics instructor for University of Texas at Brownsville summer school on gravitational radiation

2004 Instructor, summer school on “Hot Points in Astrophysics and Cosmology”, Dubna, Russia

2004 Dean’s Award for Excellence in Teaching, College of Computer, Mathematical, and Physical Sciences, University of Maryland

2000 Scriptwriter, Adler Planetarium, Chicago, Illinois
Head writer for the planetarium show “Black Holes: Into the Dark Abyss”, which debuted in the Fall of 2000

1999 - Assistant professor (1999–2004), associate professor (2004–2009), and full professor (2009–), University of Maryland
Courses include graduate stellar structure and evolution (spring 2000 and spring 2002), graduate high energy astrophysics (fall 2000, spring 2007, spring 2009, spring 2017, and fall 2022), introductory astronomy for non-majors (spring 2001, fall 2001, spring 2005, fall 2006, fall 2011, and spring 2024), graduate radiative processes (fall 2002, fall 2013, fall 2014, fall 2015, fall 2016, and fall 2021), undergraduate theoretical astrophysics (spring 2003), introductory astronomy for majors (fall 2003, continued spring 2004; fall 2017, continued spring 2018; fall 2018, continued spring 2019; fall 2020, continued spring 2021), undergraduate cosmology for majors (fall 2007), high energy astrophysics for undergraduate majors (spring 2008), life in the universe (fall 2008 and fall 2009), problem solving in astrophysics (spring 2010), honors class on black holes (spring 2010, spring 2011, and spring 2012), honors class on life in the universe (spring 2014, spring 2015, and spring 2016), graduate course on practical astrostatistics (spring 2018), undergraduate course on practical astrostatistics (spring 2019), black holes for undergraduate non-majors (spring 2022), stellar structure and evolution for undergraduate majors (spring 2023).

Curriculum Vitae of M. Coleman Miller, Page 3

- 1999 - Graduate thesis advisor or co-advisor at the University of Maryland for Jamie Cohen, Megan DeCesar, Alex Dittmann, Mike Gill, Kayhan Gültekin, Isiah Holt, Vanessa Lauburg, Dheeraj Pasham, Siddhant Solanki, Gokul Srinivasaragavan, Corbin Taylor, Yvette Thackeray, and John Vanlandingham. Graduate thesis committee member for an additional 85 students. Postdoctoral advisor for Sudip Bhattacharyya and Stratos Boutloukos, and co-advisor for postdoctoral researchers Bruno Giacomazzo and Sean O'Neill. Undergraduate thesis advisor or co-advisor for Ryan Abrahams, Shreya Anand, Ernesto Benitez, Mia Bovill, Dylan Britt, Laura Dunlap, Ben Flaggs, Katie Futrowsky, Jacob Golomb, Bryan Holler, Ben Johanson, Ashley King, Kalman Knizhnik, Scott Lawrence, Jennifer Liang, Nick Magnelli, Brian Prager, Shawn Rosofsky, Joseph Weller, Yuqin Wang, and Logan Wood.
- 1999 - Public speaker
22 talks at the University of Maryland Open House on topics including black holes, neutron stars, cosmology, and life in the universe. More than 40 additional talks to school groups from kindergarten to AP physics classes, as well as to astronomical societies
- 1995 - 1999 Lecturer, Adler Planetarium
Delivered series of lectures on black holes and neutron stars, and series of lectures on the cosmological distance scale, in the Adler Adult Lecture Series. Also taught general relativity and black hole theory to gifted high school students.
- 1996 - 1998 Consultant, Adler Planetarium
Helped develop scientific content for “Seeing the Invisible Universe”, the Fall 1996 planetarium sky show describing recent discoveries in X-ray and gamma-ray astronomy, and consulted on exhibit development and presentations
- 1995 Internet instructor, DuSable High School, Chicago, Illinois
Introduced high school students and teachers to Unix and the World Wide Web

Prizes and Awards

Co-Awardee of the 2022 Bruno Rossi Prize, with the NICER team

Professional Societies

International Astronomical Union
American Astronomical Society
American Physical Society

Accepted Proposals

- 2020 Principal Investigator on the proposal “Optimizing Mass, Radius, and Equation of State Information from NICER Data”, NASA Astrophysics Data Analysis Program
- 2017 Co-Investigator on the proposal “The Central Role of Compact Star Clusters in the Early Universe”, NASA Astrophysics Theory Program
- 2016 Co-Investigator on the proposal “Unifying Spectral and Timing Studies of Relativistic Reflection in Active Galactic Nuclei”, NASA Astrophysical Data Analysis Program
- 2016 Principal Investigator on the proposal “Gravitational Waves and Neutron Star Oscillations”, Fundação de Amparo à Pesquisa do Estado de São Paulo
- 2013 Co-Investigator on the proposal “The Multiscale Physics of Massive Black Hole Formation, Growth and Feedback”, Theoretical and Computational Astrophysics Network
- 2012 Simons sabbatical fellowship, for the study of electromagnetic counterparts to super-massive black hole binary mergers
- 2010 Principal Investigator on the proposal “Exploration of Extreme Mass Ratio Inspirals with a Tree Code” to the NASA Astrophysics Theory Program

Curriculum Vitae of M. Coleman Miller, Page 4

- 2007 Principal Investigator on the proposal “Development of a Tree Code for Extreme Mass Ratio Inspirals” to the NASA Astrophysics Theory Program
- 2007 Principal Investigator on the proposal “Probing Extreme Physics Through Analysis of Neutron Star Surface Emission” to the National Science Foundation Stellar Astronomy and Astrophysics program
- 2007 Co-Investigator on the proposal “Intermediate-Mass Black Holes in Globular Clusters: Key Photometric Fingerprints” to the Hubble Theory program
- 2006 Co-Investigator on the proposal “In Search of Black Hole Spin” to the National Science Foundation Stellar Astronomy and Astrophysics program
- 2003 Co-Investigator on the proposal “Ultra-Luminous X-ray Sources in the Barred Spiral Galaxy NGC 1672”, using the XMM-Newton spacecraft
- 2003 Principal Investigator on the proposal “Dynamics of Black Holes in Dense Stellar Regions”, to the NASA Astrophysics Theory Program
- 2001 Principal Investigator on the proposal “Understanding High-Density Matter Through Analysis of X-ray Bursts”, to the National Science Foundation Stellar Astronomy and Astrophysics program

Professional Activities

- 2018–2021 Councilor, Division of Astrophysics, American Physical Society
- 2018-2021 Member, Executive Committee, Division of Astrophysics, American Physical Society
- 2018 Reviewer, Narodowe Centrum Nauki (Polish National Science Centre)
- 2017 Member, Einstein/Hubble/Sagan Prize Committees, American Astronomical Society
Reviewer, Established Program to Stimulate Competitive Research (EPSCoR)
Reviewer for New York University Abu Dhabi
Member, Pierce and Warner Prize Committees, American Astronomical Society
- 2016 Part of committee to review the Institute for Mathematics, Astrophysics and Particle
Physics at Radboud University (Nijmegen, the Netherlands)
Member, Pierce and Warner Prize Committees, American Astronomical Society
Chair, advisory board for the West Virginia Center for Gravitational Waves and Cos-
mology (to 2018)
- 2015 Reviewer, United States-Israel Binational Foundation
Member, Bethe Prize Committee, American Physical Society
Reviewer, NASA Postdoctoral Program
- 2014 Member, Bethe Prize Committee, American Physical Society
Reviewer, Established Program to Stimulate Competitive Research (EPSCoR)
Organizer, session for 2014 COSPAR meeting
- 2013 Organizer, relativistic astrophysics session for the 10th Amaldi Conference on Gravitational
Waves
Science advisor for the KITP workshop A Universe of Black Holes
- 2012 Reviewer for NASA Postdoctoral Program
Reviewer for the Netherlands Organisation for Scientific Research
Reviewer for NSF Centers for Research Excellence in Science and Technology Program
Member of Executive Committee, Division of Astrophysics, American Physical Society
(to 2014)
- 2011 Reviewer for Swiss National Science Foundation
Reviewer for Deutsche Forschungsgemeinschaft program
Member, NSF Centers of Research Excellence in Science and Technology review panel
Member, NSF Astronomy and Astrophysics Postdoctoral Fellowship panel
Scientific organizing committee, conference on single and double massive black holes in
galaxies, Ann Arbor, MI, 22-25 August 2011
- 2010 Member, INCITE review panel
Chair, LIGO Program Advisory Committee (to 2014)
Chair, Chandra proposal review, June 2010
- 2009 Co-Organizer, “Matter and Electromagnetic Fields in Strong Gravity”, College Park,
Maryland, 24-28 August 2009
- 2008 Member, Rossi X-ray Timing Explorer panel
Member of scientific organizing committee for dense matter session at July 2008
COSPAR meeting in Montreal
- 2006 Exec. Comm. member of the High Energy Astrophysics division of the AAS (to 2009)
Member, LIGO Program Advisory Committee (to 2009)
External reviewer for the PPARC program

Curriculum Vitae of M. Coleman Miller, Page 6

- 2005 Member, NSF review panel for LIGO
Member of scientific organizing committee, “Sixth LISA International Symposium”,
Goddard Space Flight Center
- 2004 Member, Chandra X-ray Observatory review panel
Member of scientific organizing committee, “Making Waves with Intermediate-Mass
Black Holes”, Penn State University
- 2003 Reviewer for the United States-Israel Binational Science Foundation
Session chair and member of scientific organizing committee, meeting on astrophysical
sources of gravitational radiation
Member, NSF review panel for the Advanced LIGO concept
Member, Chandra X-ray Observatory review panel
Session chair, 10th Marcel Grossman meeting on general relativity
Member of scientific organizing committee, “Globular Clusters and Gravitational
Waves”, Penn State University
Member of scientific organizing committee, Second Gravitational Wave Phenomenology
Workshop, Penn State University
- 2000 Panel chair, RXTE proposal review
Session chair, 2000 Maryland October Astrophysics Conference
Reviewer for the Cooperative Grants Program of the U.S. Civilian Research and Devel-
opment Foundation
- 1999 External reviewer for the Scholarly Studies Program of the Harvard-Smithsonian CfA
Member, Astro-E proposal review panel
- 1997 Member, Compton Gamma-Ray Observatory proposal review panel
- 1992– Member of multiple theory proposal review panels for National Science Foundation (in-
cluding the Stellar Astronomy and Astrophysics Program and the Gravitational Physics
program) and NASA (including the Astrophysics Theory Program)
- 1992– Reviewer of more than 200 articles submitted to ApJ, MNRAS, Phys. Rev. Letters,
Phys. Rev. D., Nature, Science, Astronomy & Astrophysics, and several other journals
- 1992– Reviewer of books and book proposals for various publishers including Princeton Uni-
versity Press and Oxford University Press

Presentations

1. “Radius measurements of neutron stars and implications for dense matter”, seminar, Xiamen University, Xiamen, China, 18 April 2024
2. “The EMRI-TDE connection”, invited talk, Loss cones in Como meeting, Como, Italy, 8 February 2024
3. “Learning about nuclear physics from neutron star observations”, astronomy colloquium, Radboud University, 28 November 2023
4. “Learning about fundamental physics using black hole observations”, invited talk, Dutch Black Hole Consortium meeting, Radboud University, 17 November 2023
5. “Neutron stars, the high-density equation of state, and NICER”, invited talk, Physics of Neutron Stars meeting, University of Maryland, 27 October 2023
6. “Neutron Star Observations and Dense Matter”, invited talk, Modern Physics of Compact Stars meeting, Yerevan, Armenia, 12 September 2023
7. “A NICER View of Neutron Stars”, physics colloquium, University of Virginia, 8 September 2023
8. “Neutron Star Cooling”, invited talk, Aspen Center for Physics, 24 July 2023
9. “PREX/CREX and Astronomical Observations of Neutron Stars”, invited talk, Jefferson Laboratory Hall A/C meeting, 30 June 2023
10. “Understanding dense matter using NICER observations”, physics colloquium, Texas A&M, 19 January 2023
11. “Neutron Stars and Nuclear Physics”, invited talk to the Physical Review, 1 December 2022
12. “Measuring Neutron Stars”, colloquium, symposium in honor of Mal Ruderman, Columbia, 31 October 2022
13. “Electromagnetic Observations of Neutron Stars”, invited talk, The Future of Neutron Rich Matter, Amherst, MA, 13 October 2022
14. “Measurements of Neutron Stars and Clues to the Nature of Dense Matter”, invited talk, Brazilian Physical Society Spring Meeting, Natal, Brazil, 26 September 2022
15. “Tidal disruptions and EMRIs from tidal separation of binaries”, invited talk, TDEs and EMRIs dynamics, Como, Italy, 6 September 2022
16. “NICER Measurements and Implications for Dense Matter”, invited talk, CSQCD, Banff, Canada, 5 August 2022
17. “X-ray Measurements of Neutron Star Masses and Radii”, invited talk, IAU general assembly, Busan, South Korea, 5 August 2022
18. “Learning about dense matter from gravitational waves”, invited talk, PAX22 meeting, MIT, 2 August 2022
19. “Learning about dense matter from NICER observations”, invited talk, European Centre for Theoretical Studies workshop on “Neutron stars as multi-messenger laboratories for dense matter”, 21 June 2022
20. “Clues to the properties of dense matter using NICER observations”, physics colloquium, University of Illinois, 9 February 2022
21. “Learning About Dense Matter from Astronomical Observations”, seminar, nuclear theory group, University of Maryland, 9 December 2021
22. “Taking the Measure of Neutron Stars with NICER”, colloquium, California State University at Long Beach, 18 October 2021
23. “A NICER Path to Neutron Star Radii”, colloquium, University of Chicago, 13 October 2021
24. “NICER and Neutron Star Radii”, invited talk, Modern Physics of Compact Stars, 27 September 2021
25. “Neutron Star Measurements with NICER”, invited talk, International Symposium on Nuclear Symmetry Energy, 23 September 2021
26. “What Have We Learned About Dense Matter from NICER?”, seminar, Astrophysical and Cosmological Relativity division of the Albert Einstein Institute, Potsdam, Germany, 22 September 2021

Curriculum Vitae of M. Coleman Miller, Page 8

27. “Implications of Neutron Star Radius Measurements Using NICER”, astrophysics seminar, Los Alamos National Laboratory, 2 September 2021
28. “NICER Constraints on the Nuclear Equation of State”, invited talk, “Exploring Extreme Matter in the Era of Multimessenger Astronomy: from the Cosmos to Quarks”, Aspen Center for Physics, 13 July 2021
29. “Measuring the Radii of Neutron Stars”, colloquium, Aspen Center for Physics, 1 July 2021
30. “NICER Measurements of the $2.1 M_{\odot}$ pulsar J0740+6620”, invited talk, European Centre for Theoretical Studies workshop on “Neutron stars as multi-messenger laboratories for dense matter”, 15 June 2021
31. “Learning about neutron stars with NASA’s NICER mission”, IAG-USP Astronomy seminar, University of São Paulo, 12 May 2021
32. “NICER Measurements of Pulsars PSR J0030+0451 and PSR J0740+6620”, S@INT seminar, Institute for Nuclear Theory, University of Washington, 22 April 2021
33. “NICER Constraints on the Neutron Star Equation of State”, invited talk, American Physical Society meeting, 17 April 2021
34. “NICER, Gravitational Waves, and Neutron Stars”, nuclear theory seminar, Arizona State University, 23 September 2020
35. “Learning About Dense Matter from Neutron Stars”, nuclear theory seminar, University of Minnesota Twin Cities, 22 September 2020
36. “Learning About Dense Matter Using NICER”, invited talk, Compact Stars and Quantum Chromodynamics meeting, 17 August 2020
37. “What Can We Learn From Gravitational-Wave Observations?”, invited talk, European Astronomical Society meeting, 3 July 2020
38. “The Insides of Neutron Stars”, astrophysics seminar, Center for Computational Astrophysics, Flatiron Institute, 16 April 2020
39. “A NICER Measurement of a Neutron Star”, astronomy colloquium, Radboud University, 10 March 2020
40. “Extremal Principles in Physics”, astronomy theory seminar, Radboud University, 19 February 2020
41. “A NICER View of a Neutron Star”, astronomy colloquium, University of Maryland, 29 January 2020
42. “Neutron Star Mass and Radius from X-ray Observations: the Next Five Years”, invited talk, Dense Matter & Neutron Star Mergers, Institute for Nuclear Theory, University of Washington, 16 December 2019
43. “A NICER View of a Neutron Star”, strong gravity seminar, Perimeter Institute, 12 December 2019
44. “Multiscale Applications of Gravitational-Wave Physics”, astronomy seminar, University of Michigan, 26 November 2019
45. “Exploring the Interiors of Neutron Stars”, physics colloquium, University of Guelph, 12 November 2019
46. “Unveiling the Interiors of Neutron Stars”, nuclear physics seminar, Ohio University, 29 October 2019
47. “What We Do and Do Not Know About Neutron Star Cores”, strong gravity seminar, Perimeter Institute, 25 September 2019
48. “Gravity in Astrophysics”, invited talk, Precision Gravity: from the LHC to LISA, Munich Institute for Astrophysics and Particle Physics, Garching, Germany, 5 September 2019
49. “Astrophysical Context of BH-BH Coalescences”, invited talk, Precision Gravity: from the LHC to LISA, Munich Institute for Astrophysics and Particle Physics, Garching, Germany, 27 August 2019
50. “Spilling the Guts of Neutron Stars”, invited talk, Nordita, Stockholm, Sweden, 16 August 2019
51. “What your competitor’s BBH model can’t do”, invited talk, The New Era of Gravitational-Wave Physics and Astrophysics, Kavli Institute of Theoretical Physics, 10 July 2019
52. “Constraining the High-Density Equation of State with Astronomical Observations”, invited talk, Merging Visions, Kavli Institute of Theoretical Physics, 26 June 2019
53. “Understanding the Interiors of Neutron Stars”, KIPAC astronomy colloquium, Stanford University, 23 May 2019

54. “Peering Inside Neutron Stars”, astronomy colloquium, University of Maryland, 1 May 2019
55. “What can Gravitational Waves Tell Us About the Assembly of Supermassive Black Holes?”, invited talk, American Astronomical Society meeting, Seattle, Washington, 7 January 2019
56. “LISA in the Extreme”, physics colloquium, Montana State University, 2 November 2018
57. “Frontiers in Black Hole Astrophysics”, invited review, Unsolved Problems in Astrophysics and Cosmology, Budapest, Hungary, 2 July 2018
58. “Extreme and Intermediate-mass Black Hole Inspirals”, invited talk, 21st Capra meeting, Golm, Germany, 28 June 2018
59. “What can NS Mergers Tell Us About Dense Matter?”, invited talk, Compact Stars and QCD, New York, NY, 13 June 2018
60. “Arguments For and Against Intermediate-Mass Black Holes”, invited talk, APS April Meeting, Columbus, Ohio, 17 April 2018
61. “Could Dark Matter Consist of Primordial Black Holes?”, physics seminar, University of São Paulo, São Paulo, Brazil, 21 March 2018
62. “Neutron Stars Going Bump in the Night”, cosmology seminar, Johns Hopkins University, 16 November 2017
63. “When Neutron Stars Collide”, astrophysics theory seminar, University of Florida, 25 October 2017
64. “Why Should We Care About Double Neutron Star Mergers?”, invited talk, Joint Space-Science Institute symposium on neutron star gravitational wave detection, University of Maryland, 16 October 2017
65. “Brainstorming: Key Questions and Challenges”, invited review talk, And then there was Light: Electromagnetic Signatures of Stellar Mass Binary Black Hole Mergers, Leiden, Netherlands, 4 September 2017
66. “Putting a Spin on Stellar-Mass Black Holes”, astronomy seminar, Penn State, 1 September 2017
67. “Basics of Magnetic Accretion”, invited talk, High Energy Astrophysics Division meeting, Sun Valley, Idaho, 24 August 2017
68. “Systematics in Mass and Radius Measurements Using NICER data”, invited talk, eXtreme Matter meets eXtreme Gravity, Bozeman, Montana, 18 August 2017
69. “Neutron Star Measurements Using X-rays and Gravitational Waves”, colloquium, Instituto Nacional de Pesquisas Espaciais, São José dos Campos, Brazil, 9 August 2017
70. “Astrophysical Implications of LIGO’s Gravitational Wave Detections”, invited talk, The Physics of Extreme-Gravity Stars, Nordita, Stockholm, Sweden, 21 June 2017
71. “NICER overview and Status”, invited talk, Nuclear Astrophysics in the Gravitational Wave Era, Trento, Italy, 13 June 2017
72. “Neutron Star Measurements Using X-rays and Gravitational Waves”, invited talk, Nuclear Astrophysics in the Gravitational Wave Era, Trento, Italy, 13 June 2017
73. “Black Holes and Revelations: Gravitational Wave Detections”, physics colloquium, University of Iceland, Reykjavik, Iceland, 29 May 2017
74. “The Wave of the Future”, astronomy colloquium, University of São Paulo, 22 March 2017
75. “How to Tell When You’ve Busted CDM”, physics colloquium, MIT, 18 October 2016
76. “CDM vs. Perceived Structure”, astronomy seminar, Johns Hopkins University, 10 October 2016
77. “Future X-ray and Gravitational Wave Measurements of Neutron Star Masses and Radii”, invited talk, workshop on laboratory and astronomical observations of dense matter, Institute for Nuclear Theory, University of Washington, Seattle, 18 July 2016
78. “An Upper Bound on Neutron Star Masses from Models of Short Gamma-Ray Bursts”, contributed talk, 21st International Conference on General Relativity and Gravitation, Columbia University, 11 July 2016
79. “Implications of the Gravitational Wave Event GW151226”, invited talk, Dense Stellar Environments as a Probe of Astrophysics and General Relativity, Benasque, Spain, 15 June 2016
80. “Dynamical Formation of Double Black Hole Binaries”, invited talk, Dense Stellar Environments as a Probe of Astrophysics and General Relativity, Benasque, Spain, 9 June 2016

Curriculum Vitae of M. Coleman Miller, Page 10

81. “Systematic Errors in Neutron Star Radius Measurements”, invited talk, Neutron Stars in the Multi-Messenger Era, Ohio University, 25 May 2016
82. “The Wave of the Future”, physics colloquium, University of Maryland, Baltimore County, 27 April 2016
83. “A New Method for Finding Point Sources in High-energy Neutrino Data”, ITC lunchtime seminar, Harvard, 21 April 2016
84. “GW, short γ -ray bursts, and constraints on NS matter”, ITC colloquium, Harvard, 21 April 2016
85. “The Prospects and Challenges of Measuring NS Masses and Radii Using Waveform Modeling”, invited talk, Accretion onto Magnetized Neutron Stars, Nordita, Stockholm, Sweden, 23 March 2016
86. “The Era of Gravitational-Wave Astronomy”, astronomy seminar, University of Michigan, 18 March 2016
87. “Short GRBs and the Maximum Mass of Neutron Stars”, astronomy colloquium, University of Michigan, 17 March 2016
88. “The Implications of GW150914”, physics seminar, Hillsdale College, 14 March 2016
89. “Neutron Star Upper Mass Limits from GRBs and GWs”, physics colloquium, Texas Tech University, 25 February 2016
90. “Standard Channels for Binary Formation”, invited talk, Rapid-Fire Workshop on Compact Binary Mergers, Columbia University, 20 February 2016
91. “The Discovery of Gravitational Waves: GW at GW”, physics seminar, George Washington University, 16 February 2016
92. “Learning about Neutron Star Matter from X-rays and Gravitational Waves”, invited talk, The Many Faces of Neutron Stars, Garching, Germany, 14 September 2015
93. “Systematics and Statistics for NICER Determination of Neutron Star Masses and radii”, invited talk, Extreme Gravity Workshop, Bozeman, Montana, 20 August 2015
94. “The Challenges of Determining Neutron Star Masses and Radii”, invited talk, The Neutron Star Radius and All That Jazz, Montreal, Canada, 2 July 2015
95. “Constraints on the Dense Matter EOS from Burst Oscillations”, invited talk, Forty Years of X-ray Bursts, Madrid, Spain, 18 June 2015
96. “Neutron Star Upper Mass limits from GRBs and GWs”, contributed talk, What Comes Next for LIGO?, Silver Spring, MD, 7 May 2015
97. “Measurements, Causes, and Effects of Black Hole Spin”, invited talk, Compact Objects as Astrophysical and Gravitational Probes, Leiden, Netherlands, 5 February 2015
98. “Gravitational Wave Detection of Massive Stellar BH Binaries”, invited talk, Aspen meeting on black holes in dense star clusters, Aspen, CO, 22 January 2015
99. “Determining Neutron Star Masses and Radii using NICER Energy-Resolved Waveform Data”, contributed talk, AAS meeting, Seattle, 6 January 2015
100. “Black Hole Astrophysics”, invited talk, GR@99, Bad Honnef, Germany, 18 September 2014
101. “Challenges in Measuring Neutron Star Radii”, colloquium, Tuorla Observatory, University of Turku, Finland, 12 August 2014
102. “Alignment of Supermassive Black Hole Binary Orbits and Spins”, invited talk, COSPAR meeting, Moscow, Russia, 6 August 2014
103. “Challenges in Measuring Neutron Star Radii”, invited talk, workshop on Binary Neutron Star Coalescence as a Fundamental Physics Laboratory, Seattle, Washington, 15 July 2014
104. “Supermassive Black Hole Binaries: The Case for Aligned Spins”, invited talk, workshop on Unsolved Problems in Astrophysics and Cosmology, Budapest, Hungary, 5 July 2014
105. “Physics with Gravitational Wave Detections”, invited talk, Aspen workshop on ultracompact binaries, Aspen, Colorado, 13 June 2014
106. “Gravitational Waves and the Joint Space-Science Institute”, presentation to congressional staffers, University of Maryland, 17 April 2014
107. “Lemming Black Holes”, astronomy colloquium, McGill University, 15 April 2014

Curriculum Vitae of M. Coleman Miller, Page 11

108. “Theoretical Ideas for the Formation and Feeding of IMBHs”, invited talk, ULXs and their Implications for our View of the Universe, Leiden, the Netherlands, 2 April 2014
109. “Lemming Black Holes”, astronomy colloquium, Radboud University, Nijmegen, the Netherlands, 1 April 2014
110. “Mass-Radius Constraints for NS from Pulse Profile Modeling”, invited talk, Joint Space-Science Institute minisymposium, Goddard Space Flight Center, 27 March 2014
111. “Ways to Measure Neutron Star Radii”, invited presentation, workshop on the structure and signals of neutron stars, Florence, Italy, 19 March 2014
112. “Neutron Stars and Very Dense Matter”, seminar, Case Western Reserve University, 5 March 2014
113. “Lemming Black Holes”, colloquium, Case Western Reserve University, 5 March 2014
114. “Measuring the Radii of Neutron Star X-ray Bursters with NICER”, invited talk, American Astronomical Society meeting, Washington, DC, 8 January 2014
115. “Formation of Black Hole Seeds by Core Collapse”, invited talk, Astro-GR@Atlanta, Atlanta, Georgia, 18 November 2013
116. “Current Challenges in the Astrophysics of Neutron Stars and Black Holes”, Rowan University physics colloquium, 27 September 2013
117. “Neutron Stars and Their Planets”, Goddard Space Flight Center Astrophysics Colloquium, 27 August 2013
118. “The Universe of Black Holes that will be Revealed with Gravitational Waves”, Blackboard Lunch talk, Kavli Institute of Theoretical Physics, 19 August 2013
119. “Alignment of the Spins of Supermassive Black Hole Binaries”, invited talk, A Universe of Black Holes, Kavli Institute of Theoretical Physics, 16 August 2013
120. “Systematics in Measurements of Neutron Star Radii”, invited talk, Netherlands Institute for Space Research, Utrecht, Netherlands, 20 June 2013
121. “Intermediate-Mass Black Holes”, invited talk, Netherlands Institute for Space Research, Utrecht, Netherlands, 19 June 2013
122. “Gravitational Wave Radiation and Sources”, invited talk, Netherlands Institute for Space Research, Utrecht, Netherlands, 18 June 2013
123. “Challenges in the Measurement of Neutron Star Radii”, invited talk, Max Born Symposium, Wrocław, Poland, 15 June 2013
124. “How Well Can We Measure Neutron Star Radii?”, invited talk, University of Wrocław, Poland, 13 June 2013
125. “Electromagnetic Counterparts to High-Frequency Gravitational Wave Sources”, invited talk, Science from the First Gravitational Wave Detections, 23 May 2013, South Padre Island, Texas
126. “How Can We Measure Neutron Star Radii?”, invited seminar, Canadian Institute for Theoretical Astrophysics, 29 April 2013, Toronto, Canada
127. “The Dynamics of Galactic Nuclei”, invited review talk, Black Hole Fingerprints, 20 March 2013, Snowbird, Utah
128. “Neutron Stars and Physical Extremes”, astronomy colloquium, Universidad de Chile, 14 March 2013
129. “Hearing the Universe with Gravitational Waves”, astronomy colloquium, Pontificia Universidad Católica de Chile, 12 March 2013
130. “The Difficulties and Rewards of Neutron Star Radii”, astronomy seminar, Pontificia Universidad Católica de Chile, 11 March 2013
131. “The Near Future of Gravitational Wave Detection”, astronomy colloquium, Universidade Federal do ABC, São Paulo, Brazil, 7 March 2013
132. “Neutron Stars and the Unknowns of Dense Matter”, astronomy colloquium, Universidad Nacional de La Plata, Argentina, 5 March 2013
133. “The Universe As Heard With Gravitational Waves”, astronomy colloquium, Instituto de Astronomía y Física del Espacio, University of Buenos Aires, Argentina, 4 March 2013

Curriculum Vitae of M. Coleman Miller, Page 12

134. “Planets Around Neutron Stars”, invited talk, AAS Meeting, Long Beach, CA, 10 January 2013
135. “Fermi Synergies with Advanced LIGO”, invited talk, Fermi Symposium, Monterey, CA, 30 October 2012
136. “How Accretion Disks Wiggle”, CAS seminar, Johns Hopkins University, 9 October 2012
137. “Dynamics and Intermediate-Mass Black Holes”, invited talk at the Chirps, Mergers, and Explosions workshop at the Kavli Institute for Theoretical Physics, Santa Barbara, CA, 12 September 2012
138. “Using Thermonuclear Burst Spectra to Constrain NS Masses and Radii”, invited talk, IAU General Assembly, Beijing, China, 20 August 2012
139. “Neutron Stars and the Extremes of Matter”, colloquium, Yonsei University, Seoul, South Korea, 16 August 2012
140. “The Promise of Gravitational Waves”, colloquium, Seoul National University, 14 August 2012
141. “So What Happens When We Detect GWs from CBCs?”, invited talk, Rattle and Shine conference, Kavli Institute for Theoretical Physics, 3 August 2012
142. “The Implications of Neutron Star Observations for Dense Matter”, plenary talk, CompStar meeting, Tahiti, 7 June 2012
143. “Gravitational Wave Sources from a few Hz to a few kHz”, invited talk, Gravitational Wave Advanced Detector Workshop, Waikoloa Beach, HI, 14 May 2012
144. “The Implications of kHz QPOs”, invited talk, 16 Years of Discovery with RXTE, Goddard Space Flight Center, 30 March 2012
145. “Planets in the Extreme Environments of Neutron Stars”, invited talk, Planets around Stellar Remnants, Arecibo Observatory, Puerto Rico, 26 January 2012
146. “Lemming Black Holes”, University of California at Santa Cruz astronomy colloquium, 23 November 2011
147. “The Connection of LIGO to Astrophysics”, invited talk, Gravitational Wave Open Data Workshop, Livingston, LA, 27 October 2011
148. “Lemming Black Holes”, Howard University physics colloquium, 12 October 2011
149. “Galactic Centers: it’s a Binary’s Life”, invited talk, Astro-GR conference, Palma de Mallorca, Spain, 9 September 2011
150. “Using Thermonuclear Burst Spectra to Constrain Neutron Star Masses and Radii”, invited talk, Astrophysical Transients workshop, University of Washington, 18 July 2011
151. “Tidal Disruption of Tidally Separated Binaries”, invited seminar, Aspen workshop on low-mass and intermediate-mass black holes, Aspen, CO, 7 June 2011
152. “The Spins of Supermassive Black Holes”, invited seminar, Aspen workshop on supermassive black holes, Aspen, CO, 1 June 2011
153. “Middleweight Black Holes”, general relativity seminar, University of Maryland, 4 May 2011
154. “Probing NS EOS and Synergy with Advanced LIGO and Virgo”, invited talk, International X-ray Observatory meeting, Rome, Italy, 16 March 2011
155. “Using Millisecond Pulsars to Detect 10^{-9} to 10^{-7} Hz Gravitational Waves”, invited talk, Joint Space-Science Institute mini-symposium, College Park, MD, 25 February 2011
156. “Using Gravitational Waves to Constrain Neutron Star Structure”, general relativity seminar, Penn State, 15 February 2011
157. “New Results on the X-ray Spectra of Thermonuclear Bursts”, invited talk, HTRS meeting, Champéry, Switzerland, 9 February 2011
158. “Learning about Dense Matter from Neutron Stars”, astronomy colloquium, University of British Columbia, 10 January 2011
159. “Neutron Stars and the Extremes of Matter”, invited talk, III Challenges workshop, Campos do Jordao, Brazil, 16 December 2010
160. “Introduction to Gravitational Radiation”, invited talk, III Challenges workshop, Campos do Jordao, Brazil, 13 December 2010

Curriculum Vitae of M. Coleman Miller, Page 13

161. “X-ray Burst Spectra”, invited talk, Exploring Physics with Neutron Stars, Tucson, Arizona, 19 November 2010
162. “A Possible Explanation for Puzzling Properties of X-ray Bursts”, astronomy colloquium, Caltech, 20 October 2010
163. “Dynamical processes in the production of EMRIs”, invited talk, LISA-GR meeting, Paris, France, 17 September 2010
164. “Putting a spin on supermassive black holes”, astronomy seminar, University of Melbourne, 11 August 2010
165. “What do we know about black holes?”, astronomy seminar, Monash University, Melbourne, Australia, 10 August 2010
166. “AIGO and the structure of neutron stars”, astrophysics seminar, University of Western Australia, 6 August 2010
167. “Astrophysics with gravitational waves”, IAS masterclass, University of Western Australia, 5 August 2010
168. “Formation of stellar-mass black hole binaries”, invited talk, 460th Heraeus symposium, on black holes, Bad Honnef, Germany, 11 June 2010
169. “Learning about neutron stars with LIGO”, LIGO seminar, Caltech, 20 April 2010
170. “Probing the high-density matter of neutron stars”, ITC colloquium, Harvard, 1 April 2010
171. “Introduction to gravitational radiation”, invited talk, Advanced gravitational wave detectors and Advanced LIGO technology, Perth, Australia, 28 February 2010
172. “Astrophysical Influences on the Spins of Supermassive Black Holes”, colloquium, Naval Research Laboratory, Washington, DC, 25 February 2010
173. “Astrophysical Sources for Ground-Based Gravitational Wave Detectors”, invited talk, Advanced gravitational wave detectors and Advanced LIGO technology, Perth, Australia, 23 February 2010
174. “Prospects for gravitational wave detection”, invited talk, Probing Strong Gravity Near Black Holes, Prague, Czech Republic, 18 February 2010
175. “Extreme mass ratio inspirals”, invited talk, Stars and Singularities, Rehovot, Israel, 10 December 2009
176. “Neutron stars, high densities, and nuclear physics”, physics colloquium, Wake Forest University, 4 November 2009
177. “Observations of Black Holes”, invited talk, Shining Light on Black Holes, Ann Arbor, MI, 25 September 2009
178. “Signatures of Kicked Disks and Mass Loss”, invited talk, Matter and Electromagnetic Fields in Strong Gravity, College Park, MD, 27 August 2009
179. “Compact Binaries”, invited talk, Fujihara Seminar, Hayama, Japan, 27 May 2009
180. “Astrophysics With Few-Hz Gravitational Waves”, invited talk, GWADW meeting, Ft. Lauderdale, FL, 11 May 2009
181. “Astrophysical Influences on the Spins of Supermassive Black Holes”, invited talk, Observational Signatures of Black Hole Mergers, Space Telescope Science Institute, 1 April 2009
182. “Intermediate-Mass Black Holes”, Blackboard Lunch talk, Kavli Institute of Theoretical Physics, 23 March 2009
183. “The Spins and Eccentricities of Comparable-mass Black Hole Binaries”, TAPIR seminar, California Institute of Technology, 9 January 2009
184. “Extreme and Intermediate-Mass Ratio Inspirals”, invited talk, winter AAS meeting, Long Beach, CA, 5 January 2009
185. “Properties of Comparable-Mass Black Hole Binaries”, math seminar, Rochester Institute of Technology, 19 September 2008
186. “What Neutron Stars Can Tell Us About Cold High-Density Matter”, invited talk, meeting on the high-density equation of state in astrophysics, Argonne National Lab, 18 August 2008

Curriculum Vitae of M. Coleman Miller, Page 14

187. “Astrophysics with the Laser Interferometer Space Antenna”, invited talk, COSPAR Scientific Assembly, Montreal, Canada, 16 July 2008
188. “Models of Kilohertz Quasi-Periodic Brightness Oscillations”, invited talk, COSPAR Scientific Assembly, Montreal, Canada, 13 July 2008
189. “Intermediate-Mass Black Holes”, invited talk, Seventh International LISA Symposium, Barcelona, Spain, 20 June 2008
190. “How to Make a Stellar-Mass Black Hole Merge”, invited colloquium, University of Amsterdam, Amsterdam, Netherlands, 13 June 2008
191. “The Astrophysical Context of Black Hole Mergers”, invited talk, APS April meeting, St. Louis, Missouri, 14 April 2008
192. “Astrophysical Consequences of Black Hole Kicks”, ASD colloquium, Goddard Space Flight Center 4 March 2008
193. “The Plasma Extremes of Neutron Stars”, plasma physics seminar, University of Maryland, 28 November 2007
194. “Gravitational Wave Observations as Probes of Dark Energy”, invited talk, dark energy workshop, University of Maryland, 15 November 2007
195. “Off the Edge: the Innermost Stable Circular Orbit around Neutron Stars”, astronomy colloquium, University of Michigan, Ann Arbor, Michigan, 13 September 2007
196. “Alignment of black holes in microquasars”, Microquasar workshop, Agios Nikolaos, Crete, Greece, 4 June 2007
197. “Getting a kick out of black hole spin alignment”, Lund Observatory seminar, Lund, Sweden, 31 May 2007
198. “Supermassive black hole alignment, merger, and spin kicks”, astrophysics colloquium, Albert Einstein Institute, Potsdam, Germany, 25 May 2007
199. “Implications of the spin distribution of LMXBs”, invited talk, workshop on neutron star populations, Green Bank, WV, 21 May 2007
200. “Intermediate-Mass Black Holes and Gravitational Radiation”, astrophysics colloquium, Institute for Advanced Study, Princeton, NJ, 6 March 2007
201. “Intermediate-Mass Black Holes”, astronomy colloquium, University of Virginia, Charlottesville, VA, 13 November 2006
202. “Massive Black Holes”, invited review talk, LISA EMRI workshop, Golm, Germany, 18 September 2006
203. “Observations of Massive Black Holes with LISA”, invited talk, LISA analysis workshop, Greenbelt, MD, 25 June 2006
204. “Compact Binaries as Sources of Gravitational Radiation”, invited talk, compact objects conference, Cefalu, Sicily, 20 June 2006
205. “Ultraluminous X-ray Sources”, invited talk, fourth Harvard Conference on astrophysics, Cambridge, MA, 18 May 2006
206. “Astrophysical Applications of Numerical Relativity”, invited talk, AANR meeting, Guanajuato, Mexico, 6 May 2006
207. “Gravitational Waves from Intermediate-Mass Black Holes”, invited talk, APS, Dallas, Texas, 24 April 2006
208. “Constraints on Alternatives to Supermassive Black Holes”, invited talk, MODEST-6a, Lund, Sweden, 15 December 2005
209. “Gravitational Wave Sources from Dense Star Clusters”, invited talk, MODEST-6, Evanston, IL, 31 August 2005
210. “QPO constraints on neutron stars”, invited talk, A Life With Stars, Amsterdam, Holland, 24 August 2005
211. “Astrophysics With LISA”, invited talk, LISA Data: Analysis, Sources, and Science, Aspen, CO, 30 May 2005

Curriculum Vitae of M. Coleman Miller, Page 15

212. “Formation Mechanisms for Intermediate-Mass Black Holes”, invited talk, High Energy Phenomena of Compact Objects, Hsinchu, Taiwan, 14 March 2005
213. “Production of QPOs in Accreting Neutron Star Systems”, invited talk, COSPAR Colloquium on Spectra and Timing of Compact X-ray Binaries, Mumbai, India, 17 January 2005
214. “Why Neutron Stars Are Interesting”, physics colloquium, Georgetown University, 30 November 2004
215. “Gravitational Radiation from Inspirals of Intermediate-Mass Black Holes”, astronomy seminar, University of Pennsylvania, 20 October 2004
216. “Probing General Relativity With Mergers of Supermassive and Intermediate-Mass Black Holes”, solicited talk HEAD Meeting, New Orleans, LA, 9 Sep 2004
217. “Sources of Gravitational Radiation”, Hot Points in Astrophysics, Dubna, Russia, 11 Aug 2004
218. “Quasi-Periodic Brightness Oscillations from Accreting Neutron Stars and Black Holes”, Hot Points in Astrophysics, Dubna, Russia, 4 Aug 2004
219. “Intermediate-Mass Black Holes”, invited review talk, Making Waves With Intermediate-Mass Black Holes, Penn State University, 20 May 2004
220. “And All the Rest (Primordial, Intermediate, and Orphan Black Holes)”, invited review talk, APS April Meeting, Denver, CO, 1 May 2004
221. “Intermediate-Mass Black Holes”, astronomy colloquium, Rutgers University, 26 March 2004
222. “Intermediate-Mass Black Holes”, talk presented to the Data Analysis Working Group of the LISA International Science Team, College Park, MD, 8 December 2003
223. “Fundamental Physics in Quasiperiodic Brightness Oscillations”, invited review talk, X-Ray Timing 2003 Meeting, Boston, MA, 5 November 2003
224. “Challenges for Models of Intermediate-Mass Black Holes”, theoretical astrophysics seminar, University of Illinois at Urbana-Champaign, 15 October 2003
225. “Searching for Gravitational Radiation Sources Using Fluctuation Analysis”, astronomy colloquium, University of Illinois at Urbana-Champaign, 14 October 2003
226. “Black Hole Binaries, Gravitational Waves, and Cockroaches”, astronomy colloquium, University of Maryland, 8 October 2003
227. “Constraints on Superdense Matter from X-ray Binaries”, invited review talk, NATO Advanced Research Workshop on Superdense QCD Matter and Compact Stars, Yerevan, Armenia, 30 September 2003
228. “Formation of Ultraluminous X-ray Sources”, invited talk, workshop on ULXs, Johns Hopkins University, Baltimore, MD, 12 September 2003
229. “Implications of Intermediate-Mass Black Holes for Gravitational Radiation”, invited talk, 10th Marcel Grossman meeting on general relativity, Rio de Janeiro, Brazil, 22 July 2003
230. “Sonic-Point and Spin Resonance Beat Frequency Model For Kilohertz QPOs”, contributed talk, Neutron Stars on Fire, Princeton, NJ, 11 May 2003
231. “Formation Scenarios for Intermediate-Mass Black Holes”, invited talk, The Astrophysics of Gravitational Wave Sources, College Park, MD, 25 April 2003
232. “Gravitational Waves from Intermediate-Mass Black Holes”, High Energy Astrophysics Division Meeting, Mt. Tremblant, Quebec, 26 March 2003
233. “Intermediate-Mass Black Holes and Gravitational Radiation”, Penn State Gravity Center colloquium, State College, PA, 3 March 2003
234. “Intermediate-Mass Black Holes and Gravitational Radiation”, invited talk, Aspen Winter Conference on Gravitational Waves, 3 February 2003
235. “Intermediate-Mass Black Holes”, Astronomy colloquium, Case Western Reserve University, Cleveland, OH, 15 January 2003
236. “Black Holes in Dense Stellar Regions”, Astronomy and Solar Physics colloquium, Goddard Space Flight Center, Greenbelt, MD, 7 November 2002

Curriculum Vitae of M. Coleman Miller, Page 16

237. “Intermediate-Mass Black Holes and Gravitational Radiation”, colloquium, LIGO Science Center, 1 November 2002
238. “Black Hole Dynamics in Stellar Clusters”, astronomy seminar, Southwest Research Institute, 12 July 2002
239. “Origin and Implications of Intermediate-Mass Black Holes”, astronomy colloquium, University of Massachusetts at Amherst, 16 May 2002
240. “Intermediate-Mass Black Holes”, astrophysics seminar, Institute for Advanced Study, Princeton, New Jersey, 1 May 2002
241. “Medium-Size Black Holes”, plenary talk, April Meeting of the American Physical Society, Albuquerque, New Mexico, 20 April 2002
242. “The Neutron Star Equation of State From Fast Timing of X-ray Bursts”, XEUS Science Workshop, Munich, Germany, 12 March 2002
243. “Intermediate-Mass Black Holes”, invited review talk, Black Holes: Theory Confronts Reality, Santa Barbara, California, 25 February 2002
244. “Gravitational Waves and X-rays from Black Holes in Dense Stellar Clusters”, invited talk, AAS Winter Meeting, Washington, D.C., 9 January 2002
245. “Origin and Implications of Intermediate-Mass Black Holes”, astronomy colloquium, University of Maryland, 31 October 2001
246. “Origin and Implications of Intermediate-Mass Black Holes”, high energy seminar, Goddard Space Flight Center, Greenbelt, MD, 9 October 2001
247. “Production of Intermediate-Mass Black Holes in Globular Clusters”, invited talk, Two Years of Science With Chandra, Washington, D.C., 7 September 2001
248. “Consequences of Accretion onto Primordial Compact Objects”, invited talk, APS meeting, Washington, D.C., 28 April 2001
249. “Neutron Star Masses”, invited review talk, Quark Matter 2001 Conference, Stony Brook, New York, 18 January 2001
250. “Strong Gravity and Dense Matter from Observations of Compact Objects”, high energy seminar, Goddard Space Flight Center, Greenbelt, MD, 28 November 2000
251. “Strong Gravity and Neutron Star X-ray Binaries”, invited talk, HEAD meeting, Honolulu, Hawaii, 9 November 2000
252. “Small-Scale Structure in Galactic Objects Deduced from X- and Gamma Ray Timing Measurements”, invited talk, IAU Symposium #205, Manchester, England, 15 August 2000
253. “Fast Oscillations, General Relativity, and Dense Matter”, Astronomy Colloquium, Pennsylvania State University, 26 April 2000
254. “Science With a Large-Area Timing Instrument”, invited talk, Rossi 2000 meeting, Goddard Space Flight Center, 24 March 2000
255. “Strong Gravity and Ultradense Matter: Implications of Kilohertz Brightness Oscillations”, Astronomy colloquium, University of Virginia, 28 September 1999
256. “Beat-Frequency Models”, invited review talk, X-ray astronomy meeting, Bologna, Italy, 6 September 1999
257. “Recent Developments in Kilohertz QPOs”, invited review talk, HEAD meeting, Charleston, SC, 12 April 1999
258. “Theoretical Interpretation of Kilohertz Brightness Oscillations”, astrophysics colloquium, University of Maryland, 17 March 1999
259. “Taking the Pulse of a Neutron Star”, astrophysics colloquium, University of Chicago, 6 January 1999
260. “Gravitational Lensing Limits on the Average Redshift of Gamma-Ray Bursts”, contributed talk, 19th Texas Symposium on Relativistic Astrophysics, Paris, France, 16 December 1998
261. “A $2.3 M_{\odot}$ Neutron Star? Results from Kilohertz Brightness Oscillations”, theory seminar, Institute of Astronomy, Cambridge, England, 9 December 1998

Curriculum Vitae of M. Coleman Miller, Page 17

262. "Implications of Kilohertz Brightness Oscillations in Neutron Star Low-Mass X-ray Binaries", invited theory seminar, Max Planck Center for Theoretical Astrophysics, Garching, Germany, 2 December 1998
263. "Evidence for a 2.3 Solar Mass Neutron Star and Implications for Dense Matter", theory seminar, Argonne National Laboratory, Argonne, Illinois, 17 September 1998
264. "Constraints on Neutron Star Masses and Equations of State from Kilohertz QPOs", theory seminar, Harvard-Smithsonian Center for Astrophysics, Cambridge, Massachusetts, 11 February 1998
265. "General Relativistic Effects on Gas Dynamics and Radiation Transport Near Neutron Stars", invited talk, HEAD meeting, Estes Park, CO, 7 November 1997
266. "Neutron Star Mass and Radius Constraints from High-Frequency QPOs", contributed talk, HEAD meeting, Estes Park, CO, 6 November 1997
267. "Constraints on Neutron Stars Implied by Kilohertz QPOs", invited talk, BeppoSAX/RXTE Symposium, Rome, 22 October 1997
268. "Models of Kilohertz Quasi-Periodic Brightness Oscillations", invited talk, 8th Annual October Astrophysics Conference, College Park, MD, 14 October 1997
269. "Sonic-Point Model for Kilohertz Brightness Oscillations in LMXBs", contributed talk, American Astronomical Society meeting, Winston-Salem, NC, 11 June 1997
270. "Theoretical Interpretation of Kilohertz QPO from LMXBs", invited talk, American Physical Society general meeting, Washington, DC, 19 April 1997
271. "The Origin of Cosmic Gamma-Ray Bursts", physics seminar, University of Illinois at Urbana-Champaign, Urbana, Illinois, 17 April 1997
272. "Entering a Data-Rich Era in the Study of Soft Gamma-Ray Repeaters", relativistic astrophysics seminar, University of Illinois at Urbana-Champaign, Urbana, Illinois, 16 April 1997
273. "The Songs of Neutron Stars: High-Frequency X-ray Brightness Oscillations", astrophysics colloquium, University of Illinois at Urbana-Champaign, Urbana, Illinois, 15 April 1997
274. "Sonic-Point Model for High-Frequency QPOs in Neutron Star Low-Mass X-ray Binaries", invited talk, 18th Texas Symposium on Relativistic Astrophysics, Chicago, Illinois, 19 December 1996
275. "Models for Kilohertz Brightness Oscillations", physics seminar, Stanford University, Palo Alto, California, 5 December 1996
276. "Sonic-Point Interpretation of High-Frequency QPOs", astronomy seminar, University of California at Berkeley, Berkeley, California, 3 December 1996
277. "Implications of Kilohertz QPOs", physics seminar, University of California at San Diego, San Diego, California, 26 November 1996
278. "A Model for High-Frequency Brightness Oscillations from Neutron-Star LMXBs", astronomy seminar, Yale University, New Haven, Connecticut, 21 November 1996
279. "Constraints on Neutron Stars in LMXBs from High-Frequency QPOs", astronomy seminar, Columbia University, New York City, 20 November 1996
280. "Sonic-Point Model for Kilohertz Brightness Oscillations", astronomy colloquium, Copernicus Astronomical Center, Warsaw, Poland, 30 October 1996
281. "Optical/Near-IR Observations of the Bursting Pulsar", astronomy seminar, Copernicus Astronomical Center, Torun, Poland, 28 October 1996
282. "Interpretation of High-Frequency Quasi-Periodic Oscillations", physics seminar, Nordita, Copenhagen, 23 October 1996
283. "Constraints on Neutron Star Masses and Radii from Kilohertz Oscillations", astronomy seminar, Astronomical Institute "Anton Pannekoek", Amsterdam, 21 October 1996
284. "Soft Gamma-Ray Repeaters: Probes of a New Physical Regime?", physics seminar, Naval Research Laboratory, Washington, DC, 9 July 1996
285. "Entering a Data-Rich Era in the Study of Soft Gamma-Ray Repeaters", high energy astrophysics physics seminar, Goddard Space Flight Center, Greenbelt, Maryland, 8 July 1996

Curriculum Vitae of M. Coleman Miller, Page 18

286. “Soft Gamma-Ray Repeaters: Probes of a New Physical Regime?”. physics seminar, University of Illinois, Urbana, Illinois, 13 May 1996
287. “Soft Gamma-Ray Repeaters and Ultrastrong Magnetic Fields”, astronomy seminar, University of Wisconsin, Madison, Wisconsin, 4 April 1996
288. “Spectral Signatures of Supercritical Magnetic Fields”, physics seminar, University of North Carolina, Chapel Hill, North Carolina, 1 March 1996
289. “Soft Gamma-Ray Repeaters”, astronomy seminar, North Carolina State, Raleigh, North Carolina, 29 February 1996
290. “Developments in the Study of Soft Gamma-Ray Repeaters”, astrophysics colloquium, University of Chicago, Chicago, Illinois, 21 February 1996
291. “Critical Luminosities in Ultrastrong Magnetic Fields”, astronomy seminar, Northwestern University, Evanston, Illinois, 12 February 1996
292. “Optical/IR Observations of the Bursting Pulsar”, contributed talk, Aspen Workshop on Black-Hole X-ray Transients, Aspen, Colorado, 25 January 1996
293. “Compton Scattering Effects in the Spectra of Soft Gamma-Ray Repeaters”, contributed talk, Third Huntsville Symposium on Gamma-Ray Bursts, Huntsville, Alabama, 27 October 1995
294. “Radiation Drag near Slowly Rotating Neutron Stars”, contributed talk, High Energy Astrophysics Division Meeting, Napa, CA, 2 November 1994
295. “Radiation Drag Near Slowly Rotating Neutron Stars”, contributed talk, Lund workshop on neutron stars, Lund, Sweden, 1 April 1993
296. “Radiation Forces Near Neutron Stars — What a Drag!”, contributed talk, Compact Objects, Nordita, Copenhagen, Denmark, 24 March 1993
297. “Gamma-Ray Production by Neutron Stars Accreting From a Disk”, contributed talk, Compton Gamma-Ray Observatory meeting, St. Louis, Missouri, 16 October 1992
298. “Thermal Emission From Isolated Neutron Stars”, contributed talk, Isolated Pulsars, Taos, New Mexico, 24 February 1992
